Objective

Computer and Communication Engineering student skilled in **web development and SEO**. Experienced in building responsive websites, optimizing visibility, and enhancing user experience. Seeking an internship to apply my skills in real-world digital projects.

Course Projects

- Wheel Deal | Database Management System | c#
  A desktop application for buying and renting cars, managing inventory, tracking sales, and optimizing business operations.

- NutriVolve | HTML5, CSS3, JavaScript, jQuery, JSON
  A fitness and nutrition website allows users to track workouts, plan meals, and monitor progress interactively.

- Le Pavillon | HTML5, CSS3, Bootstrap, JavaScript, jQuery
  A high-end restaurant website where users can explore the menu, reserve tables, and enjoy a seamless dining experience.

- On-Page SEO Audit & Optimization | SEO Propath
  Conducted full SEO audits and optimized title tags, meta descriptions, internal links, and images using Seobility and Screaming Frog.

- Competitor Analysis & Backlink Building | SEO Propath
  Researched competitor backlinks via Ahrefs and implemented outreach for guest posting and broken link replacement.

- SEO Strategy & Performance Tracking | SEO Propath
  Built SEO strategy for a new website, conducted keyword research, and tracked performance using Google Analytics and Moz.

Certification

- Professional Diploma in Python Development (Udemy)

- The Complete JavaScript Course 2024 (Udemy)
